

## Leather Mole

Exclusive, velvety-soft nubuck leather that develops a beautiful patina over time. The leather has a lightly sanded surface, and the dyeing process preserves breathability while allowing the leather's natural healed marks to show through.

Technical specifications: From European raw hides, chrome-tanned and has been treated during tanning to add water-repellent. Manufactured without the use of environmentally harmful PCP and CF.

Thickness 1,4 - 1,5 mm

Bending durability: 20.000 - EN ISO 5402

Colour fastness to light:  $\geq 3$  - EN ISO 105-B02

Colour fastness to rubbing wet: 20 rubbings =  $\geq 3$  - EN ISO 11640

Colour fastness to rubbing dry: 50 rubbings =  $\geq 3$  - EN ISO 11640
